

Business Overview

Haylius was founded on the belief that quality, value and relationships truly mean something in how a company conducts themselves.

We offer Business and IT Consulting Services and sound industry advice that contribute to achieving your goals and strategies.

Our service offerings represent our passions and experiences. By focusing on areas of great interest, our unique skills enable us to deliver exceptional solutions and results.

Our Vision, Mission & Values

Our Vision

To deliver exceptional IT advice and service to company leaders in every industry.

Our Mission

To provide wise counsel with each engagement and delight our clients with quality results.

Our Values

- Commitment
- Client Focus
- Creativity
- Responsibility
- Determination

Our Services

Interim CIO & Advisory

Cost-effective fractional CIO services provide IT leadership during times of transition and growth. CIO Advisors listen to your needs and offer guidance and support to navigate the daily business challenges facing enterprise leaders.

Strategy & Innovation

Setting a vision and plan for IT is no small task for CIOs and Executives. We offer workshops and solutions that serve as a guide to creatively develop a holistic action plan.

Application Roadmaps

The evolution of cloud, mobile and data technologies are driving the way business is done. Is your application strategy holding back the organization? Let's partner to develop a roadmap to modernize your applications.

Cybersecurity Readiness

Is your organization prepared for the next threat? Haylius consultants have real-world experience to draw upon. Our readiness assessment will provide guidance and recommendations to combat cyber-crime.

IT Coaching & Mentoring

Career advice, professional development and leadership skills are vital for IT leaders regardless of experience. Engage with us to begin a conversation focused on you.

IT Governance & Project Portfolio

Project delivery excellence is a continuous challenge for IT departments. Business priorities are constantly changing, and IT resources are overloaded. Having a framework to prioritize and execute work is essential to effective project delivery.
